

## Special-shaped line sanding machine

### Core-competitiveness

- 1、 The introduction of the latest international wood processing technology, combine the development of China's woodworking industry, the truth, the company independent development of new practical and efficient of the surface of the wooden line processing equipment.
- 2、 This product is suitable for all kinds of gray paint line, real wood density board line, stick pedal line, line, aluminum material LVL linear (such as door edge, door frame, the line that play a Angle, phase frame, wave plate, crib, etc.), the wooden line L and wood plane, special-shaped surface coarse and fine sanding, grinding, polishing, wire drawing. Applicable to line model show, as shown in figure:

## Specification

<b>Working Width</b>	<b>20-150mm</b>
Min working length	800mm
Working thickness	5-80mm
feeding speed	5-42m/min frequency control
feeding motor power	2.4kw
sanding head motor:	1.5kw*4
Main spindle speed:	600-2800r/min frequency control
Main spindle rotation:	0-180 °
Sponge wheel size:	25.4*100
Grinding wheel size:	200mm
dust dia:	97mm
working pressure:	0.6mpa
voltage:	380V,50Hz
total power:	11.4kw
Overall size:	4300*1500*1400
Weight:	1650kg
